

Wanted

I am currently assisting with the restoration of an **Ansaldo-Fossati TCA70 crawler tractor (circa 1950–51)** here in Australia, fitted with the Alfa Romeo 1624 diesel engine and a hydraulic blade.

Given the rarity of these machines locally, I am reaching out in the hope that someone within the clubs may have experience with this model or be able to point me in the right direction.

In particular, I am seeking any of the following:

- Workshop or operator manuals (for either the tractor or the Alfa Romeo 1624 engine)
- Parts catalogues or exploded diagrams
- Photographs or documentation of similar restorations
- Any advice regarding common issues or servicing of the steering clutches, hydraulics, or engine

The tractor appears to be largely complete and restorable, and we are keen to approach the project with as much historical accuracy as possible.

Any guidance, contacts, or even small pieces of information would be greatly appreciated.

Thank you very much for your time, and for the work you do in preserving these important pieces of machinery history.

Kind regards,

Warwick Kutchen
